

Dear Family,

Today my class started Chapter 10, **Adding and Subtracting**. I will learn how to join and take away objects in a group. Here are my vocabulary words, an activity to do, and a list of books we can read together.

Love, \_\_\_\_\_

## Key Vocabulary

### add

### subtract

## Activity

Give your child five small objects and tell them a story about the objects. Have them take objects away or add objects to the group. For example, give your child five stuffed bears. Tell a story about three of the bears going to the park. Ask how many bears are left. Continue to make up addition and subtraction stories using different objects.

## Books to Read

**Addition**  
by Sheila Cato

**Subtraction**
